EDUCATION

Great Neck South High School

Sep. 2021 – June 2025

Computer Science Specialization

GPA: 4.0/4.0

- Activities: Programming Club, Varsity Cross Country
- Awards: USACO Silver, Honor Roll, Scholar Athlete
- Relevant Coursework: Data Structures, AP Computer Science A, Intro to Programming and Java

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, Swift, C#, C++, HTML/CSS, SQL

Frameworks/Libraries: React, React Native, SwiftUI, Next.js, Node.js, Stripe, Puppeteer, Firestore, chakra-ui, chart.js

Developer Tools: Git, Unity, jGrasp, Apache NetBeans, PostgreSQL, Figma, Xcode, WebStorm

EXPERIENCE

aly.so

July 2024 – August 2024

Software Engineer Intern

aly.so

- Worked on AI web browsing assistant **Electron** app, reducing API costs by 50%
- Designed and built user-facing features using Typescript, Next.js, and Tailwind CSS

FindECs

December 2023 – March 2024

Co-Founder

findecs.org

- Spearheaded the development of a website utilized by over **175,000** students helping them find extracurriculars
- Established strategic partnerships with 20+ content creators, expanding the platform's reach by **75%**
- Utilized **Python** and **Selenium** to web scrape real-time information on new extracurricular opportunities, ensuring the platform's content remained up-to-date

PROJECTS

ResumeSwap | *JavaScript, Next.js, Stripe, Firebase, Figma*

resumeswap.org

- Designed a peer to peer resume review platform for Computer Science students with **Next.js**, accepting optional payment from users with **Stripe**
- Created a **real-time chat system** between students using **Firebase** allowing authors to receive more feedback
- Supported 1000+ resumes and 800+ users utilizing **Figma** to iterate on sleek and intuitive UI/UX designs

hackertype | *JavaScript, React, chakra-ui, Firestore, Firebase Auth, Puppeteer*

hackertype.dev

- Developed a full-stack coding typing test, over 4,000+ users and 20,000+ submissions using **React** and **Firebase**
- Implemented Email, GitHub, and **Google Authentication** to save and post user data on a live leaderboard

sleepscore | *SwiftUI, Firebase, Healthkit UI*

[GitHub](https://github.com)

- Created a mobile app using **Swift** to encourage better sleeping habits using a realtime leaderboard
- Integrated **Healthkit UI** to get real-time sleeping stats from the user's iPhone

TennisLove | *JavaScript, React Native, Firestore, Firebase Auth,*

[GitHub](https://github.com)

- Created a social networking application for tennis meetups, events, and matches using **React Native**
- Displayed event locations utilizing **Google Maps API**

EXTRACURRICULARS

Programming Club Leader

Sep. 2023 - Present

Great Neck South Programming Club

Great Neck, NY

- Coordinated club meetings, workshops, and events, ensuring smooth execution and active participation
- Delivered engaging and informative lectures on programming concepts, algorithms, and best practices during club meetings, fostering a deeper understanding among members.
- Organized successful competitive programming competitions, workshops, and networking events
